

Features of a glacial landscape

Your Tasks:

Sort these glacial features into two categories, glacial features that are formed by erosion and glacial features that are formed by deposition.

Ground moraine

Lateral moraine

Drumlins

Medial moraine

Erratic

Terminal moraine

Recessional moraines

Truncated spur

Glacial trough

Corrie (or cirque)

Arete

Hanging valley

Your Tasks:

Select one of the glacial features listed above.

Draw a labelled diagram to explain how that feature is formed.
